COVID-19 PROCEDURES

SAFETY MEASURES FOR OUR GUESTS

Dear Guest

At last we can travel again! Now is the time to plan the holiday you've been dreaming of and here at Angedras we want to reassure you that you can do so with complete peace of mind knowing that you can enjoy your stay with us in total safety.

Adhering to the advice and directives from the World Health Organization and the Local Health Authorities, we have taken all the appropriate measures to guarantee the highest standards of safety, cleanliness and hygiene during your stay at our hotel.

Hotel Sanitization

In preparing to welcome you, we have increased our already rigorous cleaning protocols so that all surfaces in the guest rooms are sanitized using certified, high quality disinfectants. Textiles are washed at high temperatures and toiletries are available in individual packaging. We also guarantee that the sanitization and cleaning of surfaces in the communal areas (reception, corridors, bathrooms, light switches, lift buttons, door and window handles) is carried out many times a day using specific cleaning products.

Personal Protective Equipment

All our hotel employees have undergone training and obtained certification which attests to their competence with respect to hygiene and safety protocols; they have their temperature measured daily and use Personal Protective Equipment (sanitizing gel, face masks, gloves and plexiglass barriers). These measures are indispensable for our staff to carry out their jobs in safety both for their own health and the health of our guests.

Signs have been placed in the communal areas to remind guests to use face masks to cover the nose and mouth and to maintain social distancing.

Hand gel dispensers are in place in the hotel entrance, reception and the

corridors which lead to the guest rooms and the breakfast room.

Use of the Breakfast Room

In order that guests can fully enjoy breakfast in safety, we have introduced table service only in the breakfast room. Staff will be available to take your individual orders and everything will be served to you at your table. This measure is specifically designed to limit physical contact between staff and guests and to limit handling of products and utensils within the breakfast room.

The layout of tables and chairs has been designed to guarantee distancing in accordance with current regulations.

Tables and chairs are sanitised after every use.

As always, we are dedicated to providing the very best in hospitality and we look forward to welcoming you soon as guests in our hotel.

Marco and Francesco Coronzu
